

FloorRight v7.0 SP1 (September 2006):

- DWF import
- Sort material lists
 - Drop-down, legend & dialog all show same order
- When changing room types if stairs are selected and the room type allows long axis cuts a warning is shown:
 - [Yes] applies to all rooms including stairs
 - [No] applies to rooms but not stairs
 - [Cancel] cancels the operation.

FloorRight v7.0 SP2 (October 2006):

- Added rotation option to DWF import

FloorRight v7.0 SP3 (March 2007):

- Vista compatibility fixes
 - HTML help files
 - Updated WibuKey drivers
 - Rich text edit DLL update
 - Roll length dialog display refresh
- “Restore cut gap”
 - Finds any large gaps in the stock (a result of manual moving of pieces) and reduces the gap down to the current cut gap size
- Audio annotation
 - Job annotation
 - Room annotation
 - Works with SiteDraw import/export
- SiteDraw export
- Cut list available as a table in reports
